National Elevation Dataset, U.S. Geologiocal Survey (USGS), ned.usgs.gov

This map represents two different aspect analysis of the University of Georgia. Although both analysis are of the same place they were not derived from the same data, the map on the left is from file with raster data and the map on the right is a map from a file with TIN data. One thing that this map lacks is perhaps landmarks on the maps, prominent UGA buildings/structures that could help people orient themselves and read the map.
